We triage requests throughout the day; calling does not get your patient in more quickly unless it's a true emergency.

We will fax the appt. information to you. Patients will receive up to 3 appointments: a consult, visual field testing, and imaging, depending on the diagnosis.

Please tell patients that the appt can take up to 2 hours. They should bring their preferred glasses and ALL medications, including eye drops.

The waiting room size is limited; please ask patients to bring no more than one support person to the visit.
